egion Serviced: What area or region do you service? Be sure to use any and all descriptions that include areas in your region of service. This very important for search engines that will bring traffic directly to your page. Try to imagine a customer searching for a tent company. They hight be in the city of Detroit Michigan, but be searching using the term "Tent Rental Dearborn Heights" which happens to be a suburb of etroit. If you only listed that you service Detroit, you would be very unlikely to come up on any search for the above request. Example: Detroit incoln Park, Dearborn, Windsor, Highland Park, etc.
