

Engineered Tension Tents

Many Tents, One Sense of Purpose

Series 2000

The Function is in the Form

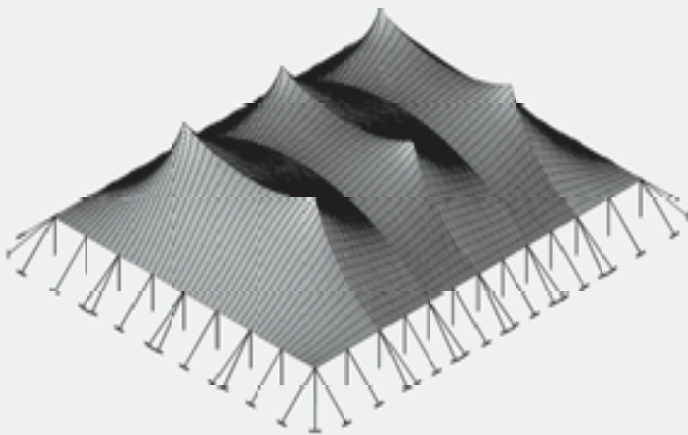

The Series 2000 is a masterpiece in tension tent manufacturing. Featuring high, sculpted peaks and engineering to meet 85 mph wind-loads, this tent will withstand the elements and look great doing it. Quality welded seams and vinyl covered webbing reinforce the graceful contours of the fabric, creating a smooth, tight surface that helps redirect the wind over and around the tent...not into it. It's not often that you can get elegance and durability in the same package, but with the Series 2000 tension tents from Aztec Tents, you can.

Benefits

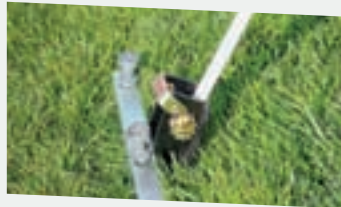

- Stunning high peaks
- Open airy interior
- Tensioned fabric
- Expandable design
- Engineered to meet 85 MPH wind-loads
- Standard wall snap line allows for easy installation of side walls
- Strong and fast "lay-flat" webbed lace lines
- Leg heights from 7'-10'

Series 2000

Specifications

- Widths: 40', 50, 60, single centerpole; 60', 80', 100 and 120' twin centerpole
- Mids: Expandable mids available in 20', 30' and 40'
- Fabric: 18oz Laminated PVC
 - Blackout UW, translucent white & colors
 - Coated PVC fabric available
 - Fabric certified flame retardant and mildew resistant
- Laceline: Web and grommet with velcro rain flap
- Fittings: Durable powder coated aluminum
- Centerpoles: 6"-8" SCH40 structural aluminum (Anodized to prevent corrosion)
- Sidepoles: 2.5" SCH40 structural aluminum (Anodized to prevent corrosion)
- Anchoring: 2" ground mounted web and ratchet assembly, 24" three hole stakebars and 42" double headed steel stakes
- Tops includes both side pole and center pole jump ropes

Series 2200

Options, Not Limits

A cohesive tent inventory is a key element in managing your business. Keeping your inventory streamlined reduces confusion and costly order picking mistakes. In the past, the easiest solution was to limit yourself to a single supplier for your tent needs. Today, Aztec Tents is offering you another option: The Compatible Plus Series 2200 is designed to be compatible with Century® Tents offered by Evansville, Indiana based Anchor Industries. Whether you need to replace an entire top or a single mid section, the Series 2200 offers you a choice, without confusion. With added benefits like vinyl coated structural webbing that sheds dirt and cleans easily, there is no reason to limit yourself.

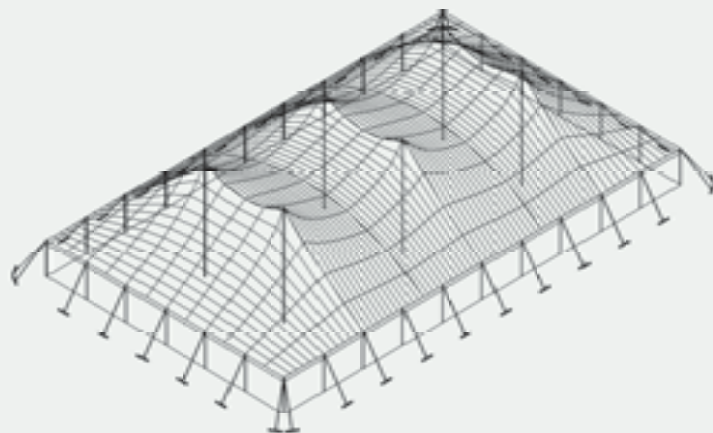

Benefits

- Compatible with the Century® Tent by Anchor Industries
- High peaks
- Tensioned fabric
- Expandable design
- Engineered to meet 70 MPH wind-loads
- Easy to clean vinyl coated webbing
- Standard wall snap line allows for easy installation of side walls

A Customer Service Revolution

Series 2200

Specifications

Legend Series™

Dramatic Versatility

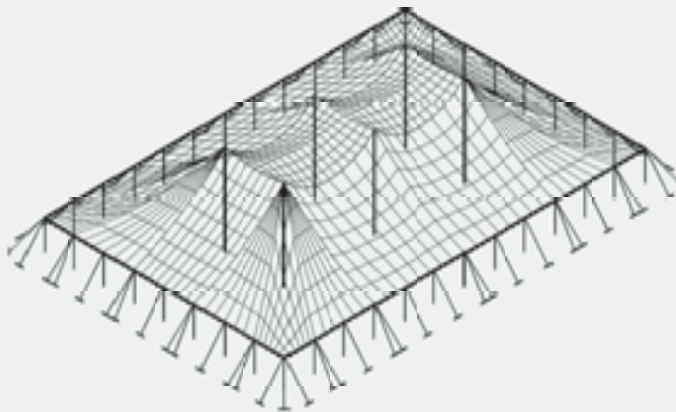

Taking the benefits of expandable tents in a completely new direction, the beautiful, high peaked Legend Series™ Pole tent is in a class of its own. With the unique ability to expand in width as well as length you'll never be at a loss to cover an event. The smaller option allows you the option of 40', 50' or 60' widths while the larger option gives you the capability of 60' 80' 100' or 120' widths. Extreme adaptability, quality workmanship and the refined contours of a peaked tension tent are all wrapped into the dramatically versatile Legend Series.

Benefits

- Expandable in length and width!
- Stunning high peaks
- Open airy interior
- Tensioned fabric
- Engineered to meet 70 MPH wind-loads
- Standard wall snap line allows for easy installation of side walls
- Strong and fast "lay-flat" webbed lace lines
- Leg heights from 7'-10'

- Anchoring: 2" ground mounted web and ratchet assembly, 24" three hole stakebars and 42" double headed steel stakes
- Tops includes both sidepole and centerpole jump ropes

Olympus Modular

Radical Tension Design

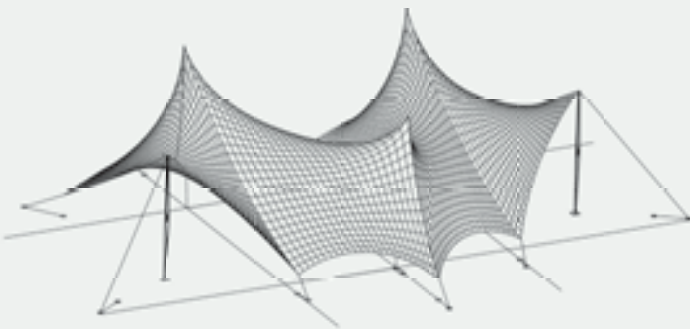

The Olympus Modular Tension Tent system features a non-symmetrical dramatically high pitched roof membrane that is used for many activities. The tent has two different styles of end sections to suit your application best. The "High End" is most often used on the front of bandshells to give a unique look to any staged event. The low end is commonly used in the back of bandshells and on mobile displays. Modular mid sections are available to extend this tensile structure to your needed length. The Olympus is a highly advanced design that is not recommended for the novice tenter.

Benefits

- Dramatically radical design
- Wall panels available to enclose tent
- No sidepoles
- Minimal storage requirements
- Can be used as a band shell
- A true portable tension structure

Olympus Modular

Specifications

- Base Size: 81'6" x 72'
- Expansion Modules: 22' in length
- Fabric: 18oz Laminated PVC
 - Blackout UW, translucent white & colors
 - Coated PVC Fabric available
 - Fabric certified flame retardant and mildew resistant
- Laceline: Web and grommet with velcro rain flap
- Fittings: Durable, engineered, powder coated steel
- Centerpoles: powder coated (white) steel mast truss system
- Anchoring: 2" Ground mounted web and ratchet assembly, and 42" double headed steel stakes
