

# JUMBOTRAC® LITE

The "Slide-In" Engineered Frame Tent

NEW 2019  
PRODUCT  
UPGRADES

## WHY JUMBOTRAC LITE?

- No lace line, Keder design cuts labor by up to 30%
- Weighs less than competitive versions
- Saves time and money on each installation
- Significantly reduces wear and tear on tent fabric
- Install fabric on the ground or in the air

## PRODUCT OVERVIEW

Based on the success of the Jumbotrac® frame system, Jumbotrac® Lite provides the key features at a fraction of the weight. The frame system features kedered tops and optional walls that slide through channels in the frame without the need for lace lines. This allows for dramatically improved installation times and significantly diminishes wear and tear on the fabric membrane.

Jumbotrac® Lite utilizes a reinforced, 2" West Coast frame platform envisioned by tent experts and desired

by event professionals for its clean, beautiful, and elegant appearance at an affordable price.

Simply convert your existing traditional 2" West Coast style frames to this new style by replacing rafters, intermediate and ridge fittings and base plates. Jumbotrac® Lite is the answer to reducing labor and saving money.

## ENGINEERING

10'-20' wide engineered to ASCE 7-10 105mph  
30' wide engineered up to ASCE 7-10 65mph  
All factored (3 Second Gust) Exposure "C"
