

TIDEWATER® ARCH

The grand entrance like no other

WHY TIDEWATER ARCH?

- Provide a focal-point entrance to your larger tents
- Incorporate with a transition mid for the ultimate in connection finishing
- Connect two larger tents with seamless ease
- Use as a stand alone boutique dining canopy

PRODUCT OVERVIEW

This highly innovative small frame tent can be used as a standalone small dining tent, as an entryway to a larger tent, or as a connecting corridor to uniquely connect two larger Tidewater® Sailcloth Tents.

The highly translucent sailcloth fabric allows natural light to enhance your next daytime event and positively glows when lit for evening gatherings. The fabric top is constructed of ProSail™III proprietary sailcloth material or a clear PVC Membrane with white or black trim.

The frame of the Tidewater® Arch is built using the Jumbotrac® profile platform and is powder coated an Antique Rust Brown with black accents.

The frame color can be customized to most any color combination. The arch is 19' wide to smartly fit between poles of adjacent tents and is expandable in 10' length modules.

ENGINEERING

System engineered to ASCE 7-10 78-95MPH
(3 Second Gust) Exposure "C"
