

FESTIVAL® CAN-T

The high-peak for maximum ease

WHY FESTIVAL CAN-T?

- Fewer parts translates to faster installations
- Easy to learn and easy to install system
- Record breaking installation times
- Engineered to ASCE 7-10 56mph
- Product can be installed by one person

PRODUCT OVERVIEW

The Festival® CAN-T is perfect for lighter duty applications where portability and labor savings are a key requirement. The key design principle behind the Festival® is the cross-cable mast support system, which allows for far less parts than other frame tents and reduces installation time. The high sweeping peaks and tensioned fabric make the Festival® CAN-T a favorite for most any outdoor event.

The simplistic design of the frame's 2.5"OD round anodized aluminum extrusions make installation easy.

The frame system is rugged enough to handle the day-to-day pressures of the commercial tent rental environment, while light enough for cost and labor savings each time the tent is installed. The frame system utilizes a modular pole system where a 20' span can be achieved with two 9'3" poles and a splice. These 9'3" poles are used for the 10x, 15x and 20x frame systems, and for the 9'3" legs.

ENGINEERING

System engineered to ASCE 7-10 56mph (3 Second Gust) Exposure "C"

THE AZTEC ADVANTAGE

THE FRAME TENT THAT ONE PERSON CAN INSTALL

SPECIFICATIONS

Sizes:

10'x10', 10'x20' Single Peak
15'x15', 20'x20'

Configurations:

One piece tent tops
Modular frame components
Longest frame component is 9'3"
Leg sizes offered in 8'H and 9'3"H

Fabric:

16oz PVC laminated blockout white standard membrane. Translucent white and other colors are available
All materials treated for mildew resistance and UV degradation

Framework:

6061-T6 Anodized Aluminum frame system with cast aluminum fittings

Flame Retardancy:

NFPA 701, CA State Fire Marshal
Title 19, CAN ULC S109-03

Engineering:

IBC 2013, ASCE 7-10 56MPH
Exposure "C"

Common Accessories:

Sidewalls, rain gutters, double valance, ground cloths, and repair kits

1. Festival® CAN-T Frame Tent with window sidewall 2. Self tensioning wall cables allow walls to slide like a shower curtain
